

Welcome in Spring with

Current Project: Catalina Casino

Located on Santa Catalina Island, the **Catalina Casino** has been a landmark and focal point of entertainment and culture since it opened on May 29, 1929. The Casino dominates the Avalon landscape, and exemplifies the style and romance of Catalina Island. Over the years, the Catalina Casino has been the venue of choice for great entertainers, Broadway productions, and motion pictures.

In the **spring** of 2010, **Spectra Company** commenced work on the exterior of the Casino to include a complete facade restoration. Spectra Company's work includes lead based paint remediation, epoxy injection, spall and crack repair, ornamental cast stone repair/replication, door and window restoration, and a complete waterproofing to include sealants and caulking. In addition to the building preservation, Spectra Company is restoring columns, surrounds, upper balcony, and decorative and non-decorative elements. Lastly, artisans are restoring the original ticket booth to include lavish marble, ornamental metal, and glass finishes.

The Greenest Building is the One that Already Exists

Spring = **Green!** Join us in the effort to reuse and restore the buildings around us. We would be more than happy to assist you in the restoration of your existing structures!

If you have a need for a proposal in any of the following restoration areas, please let me know. We would be most pleased to provide you with a free estimate.
